80/20[®] Inc. SERVICES

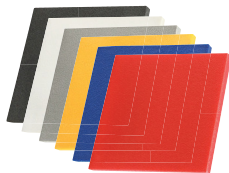

Value Add Frame Fabrication

With the help of 80/20's Frame Fabrication your project can be ready when it arrives at your door.

Custom Machining

Always walk away with the part you need using 80/20's Custom Machining service.

Panel Shop

The 80/20 Panel Shop is a one-stop shop for everything. Color, material and more!

The background of the slide features a collage of industrial scenes. On the left, there are three overlapping gears. The top gear contains a circular inset showing a factory interior with rows of metal frames. The middle gear contains a circular inset showing a worker in a red shirt. The bottom gear contains a circular inset showing a worker in a red shirt. The right side of the slide is a large orange circle with a white outline of a hand holding a wrench. The text is placed within this orange circle.

Dedicated Experience

80/20 Value Add is a frame fabrication service where we build your project and deliver it to you ready to use. We will build your project quickly and accurately; we have teams dedicated entirely to your project.

This team has over 50 years of combined experience building with 80/20 and we have dedicated over 10,000 square feet of space to our Value Add Department.

Three Levels of Value Add

80/20 Value Add Frame Fabrication offers three levels of service to help increase your productivity; we offer full assembly, sub-assemblies, and pre-loading of hardware.

PRE-LOADING

SUB-ASSEMBLY

FULL ASSEMBLY

BLY

SAVE COSTLY TIME WITH VALUE ADD

80/20 products are simple and easy to use; because we assemble them day in and day out, we are the best at building projects fast and efficiently.

We have conducted research studies and found that, on average, 80/20 has a 4:1 ratio of your time versus our time.

This means that 80/20 can build in one hour what could take you four hours to do the same.

See how Value Add Services can help save you time in this video of an 80/20 Frame Fabricator in action.

VALUE/ADD/BUILD TIME

1 Hour

80/20's experience with the product along with our specialized tools and large work area enable us to be the fastest and most efficient at building with 80/20.

YOUR BUILD TIME

4 Hours

Most companies want to improve their processes with new applications but don't have the personnel or resources to devote to assembling a project. That's where 80/20 can help.

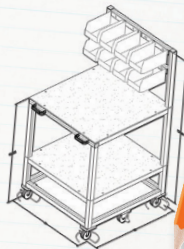

READY TO YOUR DOOR

The 80/20 Value Add service also consists of custom skidding and packaging at no additional cost. You'll receive your project just as you ordered it; clean, scratch and dent-free, and with the same level of quality that comes with all 80/20 products. If you need your project packaged into specific kits or with special labeling requirements, we can do that, too, at no extra cost.

No matter how large or what type of project you have, 80/20 can build it for you and ship it right to your door.

Call the 80/20 Tech Services Team to quote your entire build at 260-248-8030. Tech Specialists will review your design and provide a quote for FREE!

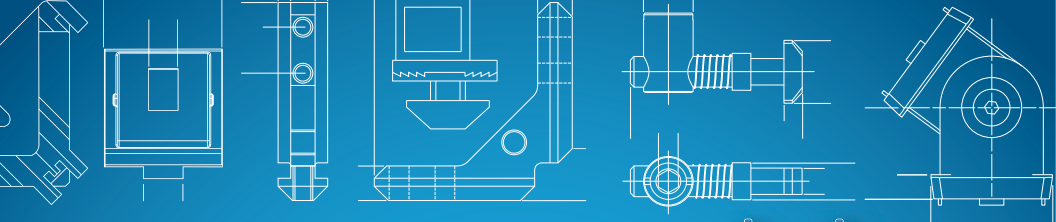

Sub Assembly

Arrives with just a few
assembly steps remaining

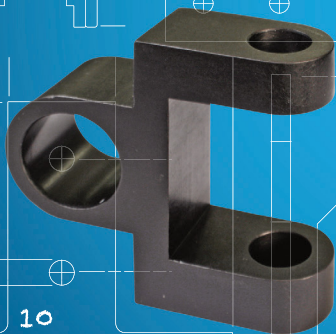

Full Assembly

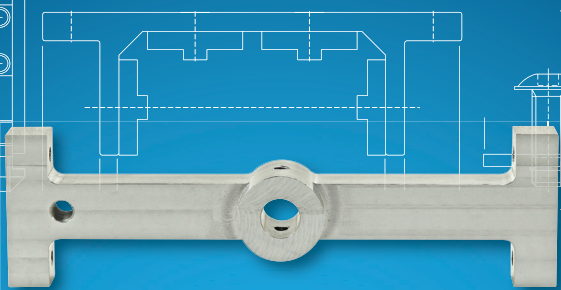

Ready for immediate use
when it arrives at your door.

Custom Machining

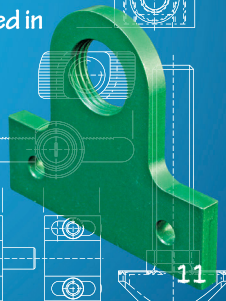

WHEN OFF THE RACK ISN'T ENOUGH

Wouldn't it be nice if off-the-shelf products always worked just as you need without any modifications? However, we know that this isn't always the case because your projects are unique to your needs and your processes.

That's why 80/20 has an extensive in-house Custom Machine Department to quickly make modifications or alterations to any part in our catalog, saving you the headache involved in outsourcing these machining services.

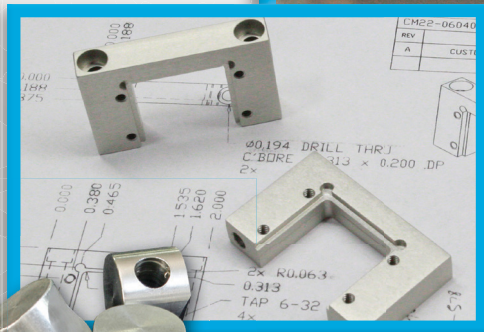

MEETS 80/20 THE NEED

If 80/20 doesn't have what you're looking for we'll work with you to create exactly what you need to meet your design specifications.

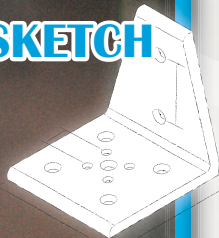

80/20 offers Custom Machining Services to fill a "design gap" for products needing modifications or entirely new products, saving you the time and money involved in dealing with multiple vendors.

Visit www.8020.net to find out how to get the process started with 80/20's Custom Machining Department

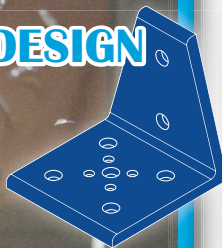

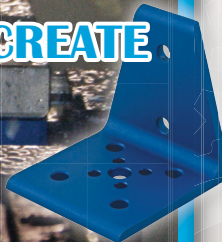

SKETCH

DESIGN

CREATE

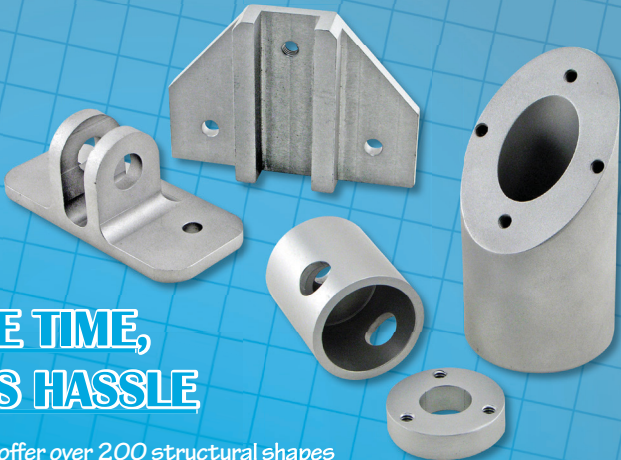

Our personalized approach to quoting your project also means that our experienced technicians work with you and your distributor to analyze the design and provide any recommendations or solutions to increase efficiency and accuracy.

CUSTOMIZE TO YOU

We've invested in material,
personnel and equipment to get
you just the part you need for
your project in a timely manner.

SAVE TIME, LESS HASSLE

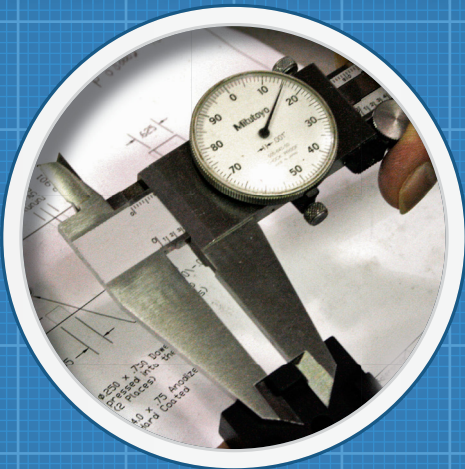

We also offer over 200 structural shapes in-stock; 80/20 can build the custom bracket you need to augment your 80/20 project. Doing this in-house saves you the time and hassle spent finding another vendor.

80/20 specializes in custom machining aluminum of large or small runs. We have in-house anodizing capabilities, saving you considerable time and money. We offer alternate finishes such as powder coat or mill finish, along with several other options.

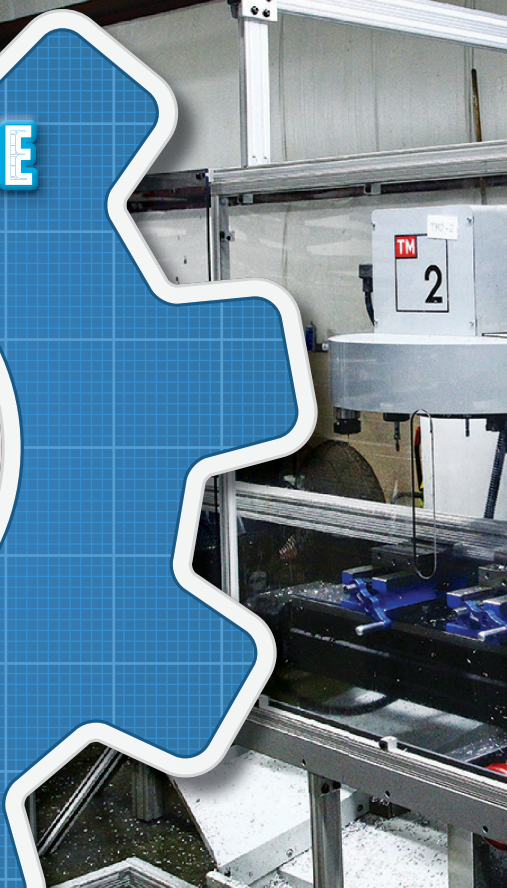

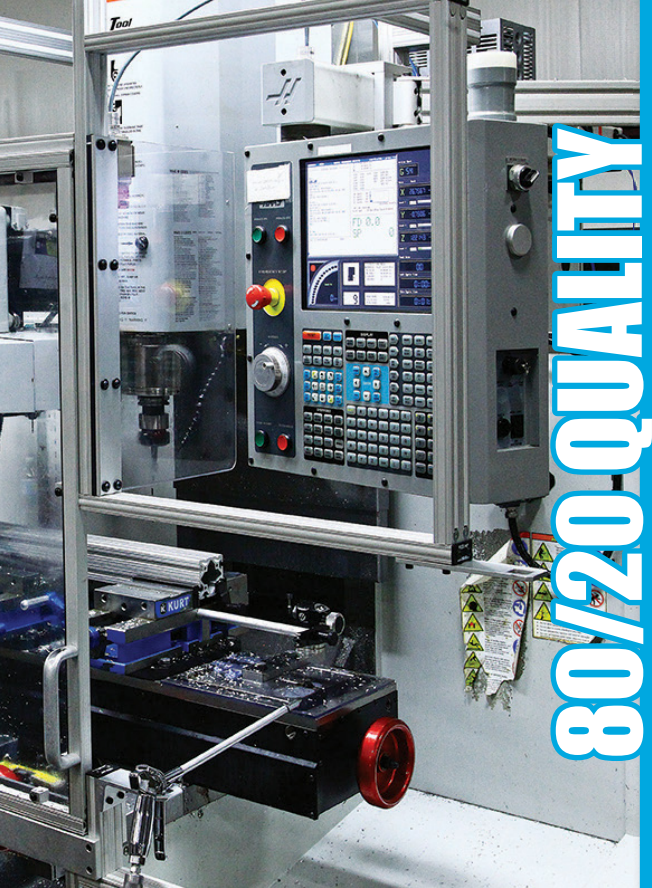

With 80/20 there are no minimum charges or quantities and you get one invoice from one vendor.

HIGH TOLERANCE

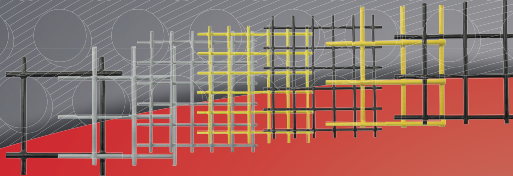

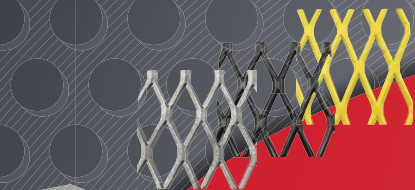

Each and every part, no matter how big or small, is sent through a thorough quality control inspection to meet 80/20's high tolerance standards.

You can expect that every 80/20 product is deburred and sent to you with a clean, finished appearance.

Each piece is packaged specifically for its size and shape. You will receive your project just as you ordered it; clean, scratch and dent-free, and with the same level of quality that comes with all 80/20 products.

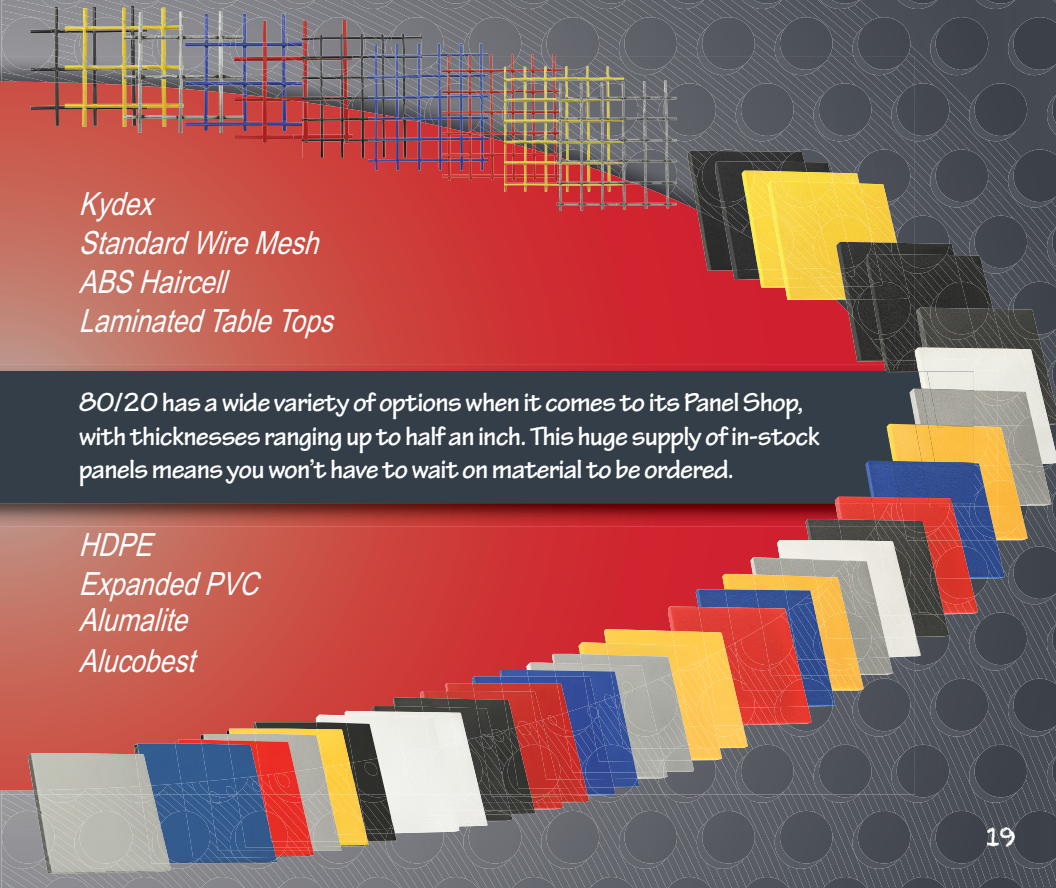

Acrylic
Expanded Metal

Laminated Table Tops*

BO/20 has a wide variety of options when it comes to its Panel Shop, with thicknesses ranging up to half an inch. This huge supply of in-stock panels means you won't have to wait on material to be ordered.

*HDPE
Expanded PVC
Alumalite
Alucobest*

EVERYTHING UNDER ONE ROOF

80/20

80/20's in-house Panel Shop is another way we provide solutions. 80/20 is committed to being the one-stop-shop for your framing needs, which is why we offer over 100 panels in stock.

DESIGNED & MACHINED

80/20 machines panels in-house, saving you valuable time and money. We have routers to make signs or label your panels as well as etch your logo into panels.

Our state-of-the-art technology enables us to send your design file directly to the panel machine, ensuring accuracy and reducing turnaround times. All of these services result in finalized panels that are easily incorporated into your 80/20 project.

Our machining capability allows us to provide your panels with that same legendary turn-around time as all of our products. Most of our machining services are standard, streamlining and simplifying both the quoting and ordering process.

Panel Shop Services

- Cut to Size
- Custom Designs
- Etching
- Lettering
- Recessing
- Perforating
- Notch for Hardware

Some applications need water or heat resistance, or perhaps a thinner or thicker panel would work best in your design. Our technicians will review your design with you and can advise on the best products for your needs.

PAY FOR WHAT YOU GET

At 80/20, you only pay for what you use. While most companies charge for drops, if you need a 2' by 3' panel, that's all you pay for. Keep in mind that this also saves on shipping costs; you're not paying to ship what you don't need and won't use.

Visit www.8020.net to find out how 80/20 can meet all your panel needs.

A man wearing safety glasses and gloves is working in a factory, handling large panels on a conveyor belt. The panels are wrapped in clear plastic and have red markings. The background shows industrial equipment and a large green archway.

As with all of our products
and services, our panels
come with the same peace of
mind we always offer.
Our panels are custom
packaged to avoid bending,
scratching or denting.
You will receive your order
clean and free of blemishes.
